Ornato Hybrid
Waterproof Floor

Ornato Hybrid Waterproof Floor

Ornato hybrid waterproof floor is specifically designed to have a great look and a unique feel of real timber flooring. It takes a luxury vinyl tone that is well covered to give the planks a weathered appearance. What makes it more unique and appealing is the different knots and grains flippantly brushed embossed surface provide a weighty texture to the boards on the floor forming a timber likeness.

Ornato hybrid waterproof flooring represent an advanced modular plank technology offering the final stylish and practical flooring solution for any office or home. The Ornato Hybrid provides extremely stylish designs that are appropriately selected to look similar to your timber, but more practical. Ornato Hybrid flooring used have exceptional product stability, hygienic, quiet, slip resistant and easy to repair and clean.

Coastal Blackbutt

If you are looking for a floor that is quite easy to install, then you should opt to use the Ornato hybrid waterproof floor. With this new generation hybrid flooring, the 5G click system keeps the floors in place, hence reducing the need for the adhesive in most spaces. The floor is 100% waterproof consisting of a multi-layer rigid core board construction, enabling a larger area to be laid without the essence for expansion trims. In addition to that, the floor has the added advantage of helping to hide imperfections which are usually found sub-floors.

Ornato hybrid waterproof is an overlay flooring system since it can be installed in all types of surfaces ranging from flat to flat surfaces such as timber floors, tiles, plywood and concrete keeping in mind that the floor should be clean, level, smooth dry and have no large cracks. Besides, it is one of the few floors that do need high regular care and maintenance, because it is made up of 0.55mm UV wear layers. If you follow the right and appropriate ways of maintenance, you will certainly increase the longevity of your floor.

Why Ornato Hybrid Waterproof Floor?
